

FrameNet Workshop

NSF-Sponsored

What: lectures on Frame Semantics, the benefits of using FrameNet data for NLP applications; presentations about research that uses FrameNet; hands-on practice building NLP applications with FrameNet data, using new FrameNet library for NLTK; and demonstrations of the MetaNet system, including the repository of linguistic metaphors and automatic metaphor extraction.

Why: Automatic text analysis requires semantically rich information about both typical and rare patterns, as well as relational meaning in language.

When: September 9 – 13, 2013 (partial participation possible)

Where: ICSI, 1947 Center St, #600, Berkeley, CA 94704
